Non-public prototype — content, contacts, brand, and operations are placeholders and are not hospital-approved.

ORDER 4 · CALM WAYFINDING

One stable visual foundation for every prototype journey

The system is clear under pressure, humane without promotion, and useful before custom fonts, images, scripts, or hospital-approved content arrive.

320 px first | English + Ethiopic geometry | Level 0–2 motion | No external requests

Color has one job at a time

Deep teal leads routine action. Red stays concentrated on emergency and error meaning. Ochre is orientation, never warning.

Comparable hierarchy across scripts

Unified Noto geometry is preferred, but content paints immediately in the system stack. Samples below assess shape and wrapping only.

Find the next clear step

Display · Home only · 36–56 px

Request an appointment

H1 · 32–48 px · one per page

Before, during, and after your visit

H2 · 24–36 px · sentence case

Essential guidance remains readable in a narrow column and never depends on an image.

Lead · 17–19 px · maximum 62ch

ሀ ለ ሐ መ ሠ ረ ሰ ሸ ቀ በ ተ ነ አ

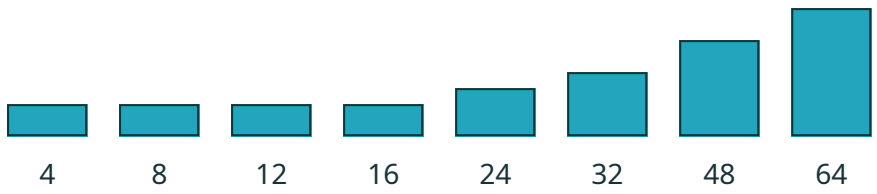

Ethiopic glyph geometry · ፩ ፪ ፫ · 12 / 09 / 2026

Professional Amharic language and device review required

Mixed script / long label: Prototype service A — የአማርኛ ጽሑፍ geometry fixture — follow-up information that is deliberately long enough to wrap without truncation.

Rhythm shows relationships

A 4 px primitive scale creates predictable internal spacing and fluid 40–64 px section rhythm without fixed-height content.

Reading measure: 45–72 characters

Practical patient guidance stays in one calm reading column. Supporting content may sit beside it only when source order, zoom, and a useful measure remain intact.

State color is never the whole message

Heading, words, edge, icon, action, and recovery distinguish information, success, warning, error, and emergency.

Information

Explain scope and the next safe step.

Request received

Use only after authoritative acknowledgement; this does not mean booked.

Review required

Name the prerequisite without using the decorative ochre accent.

Something needs attention

Preserve valid work, explain the failure, and provide recovery.

Emergency route specimen · Level 0

Choose the verified route before calling

No real phone number or hospital capability is connected in this prototype. The call action stays inert until approved facts and route logic exist.

Verified emergency number required

Icons support labels

A small project-owned SVG subset uses a 24 px grid, current color, 2 px rounded stroke, and no external package.

Information

Success

Media is optional and governed

Abstract fields test crop geometry without depicting staff, patients, facilities, equipment, or a clinical outcome.

HTML first, useful in print

Print removes navigation, interactive-only controls, decoration, shadows, motion, and optional embeds while retaining status and source context.

Approved guidance would remain here

Unapproved patient instructions are withheld. A future downloadable file must identify its type, size, version date, accessible equivalent, owner, and failure fallback.

Prototype record — content owner, approval evidence, and review date required.

Print specimen: interactive and decorative elements were intentionally removed.
