One blue. A whole experience.

Design proposal

A proposed color system for Hallelujah General Hospital · November 2026

Hallelujah blue

#0078A6

Open, clear, and distinctly Hallelujah. A cyan-blue with depth enough to do the work.

A family, not a competition.

The blue family leads. Orange adds a warm supporting accent; magenta brings occasional expression. Warm off-white, white, dark ink, and slate hold the palette together.

Three groups: brand colors, supporting neutrals, and functional status colors. The original logo stays intact.

The complete palette

Brand colors

Primary identity and interactions: the proposed blue family, anchored by #0078A6.

Skip to catalog

#EAF5F9

Blue mist

Quiet sections and information backgrounds

#D5EAF2

Blue veil

Selected surfaces and subtle blue fields

#A8D3E4

Blue air

Decorative, nonessential diagram fills; use deep blue for text

#0078A6

Hallelujah blue

Primary brand and filled main actions

#00678D

Strong blue

All text links and primary hover

#00445D

Deep blue

Headings, pressed actions and closing sections

Orange

Main supporting accent · #F26522

#FFF0E7

Pale orange

Pale companion to the supporting orange

#F26522

Warm orange

Main supporting accent

#A8430C

Deep orange

Deep companion for readable accent pairings

Magenta

Occasional expressive accent · #D81B72

#FCEAF2

Pale magenta

Pale companion to the expressive magenta

#D81B72

Magenta

Occasional expressive accent

#A61558

Deep magenta

Deep companion for readable accent pairings

Pale companions and deep shades extend each accent. They support the anchor colors; they are not additional brand accents. Yellow remains in the logo, with no separate yellow brand family.

Supporting neutrals

Main background: warm off-white #FBF8F6. White, coordinated dark ink, slate, and quiet edges complete the neutral palette.

Skip to catalog

#FBF8F6

Warm paper

Main canvas; a little warmth around the blue

#FFFFFF

Clear white

Forms, raised content and clean breathing space

#17313D

Reading ink

Body copy and essential information

#52636B

Slate

Secondary text and metadata

#CBD8DE

Quiet edge

Subtle decorative dividers; not input boundaries

#718892

Control edge

Meaningful form and control outlines

Functional status colors

Meaning, not brand decoration.

Success

A completed or successful action

#24634B

On #EEF7F1 · 6.49:1

Caution

Something to review before proceeding

#80530C

On #FFF6E5 · 6.19:1

Urgent / error

Urgent access or an error, separated by words and context

#A33330

On #FBEFED · 6.07:1

Information reuses strong blue #00678D on blue mist #EAF5F9. Caution is a functional amber, separate from the brand palette. Urgent access and errors share muted red, with distinct wording and context.

Tab here to see the focus outline.

A white separation gap keeps the dark focus ring visible around a blue button. Dark sections use a white focus outline.

Care, with a clear next step.

Use a deep shade of the same blue for the footer. Keep text and actions light.

Read usage guidance →

Contrast, made visible

Check the actual foreground and background, not the swatch in isolation.

Skip to catalog

Care starts with clarity.

This is ordinary reading text. A usable color pairing keeps practical information legible.

#FFFFFF on #0078A6

Recommended pairings · calculated sRGB contrast

Pairing	Ratio	Role
White on Hallelujah blue	4.96:1	Main button label
Strong blue on warm paper	5.97:1	Text link
Strong blue on blue mist	5.69:1	Text link in a tinted section
Reading ink on warm paper	12.87:1	Body text
Supporting ink on blue mist	5.64:1	Secondary text
White on deep blue	10.58:1	Footer text
Control edge on white	3.72:1	Input boundary · 3:1 minimum
Deep orange on pale orange	5.43:1	Supporting accent pairing
White on magenta	4.86:1	Expressive accent pairing
Deep magenta on pale magenta	6.34:1	Expressive accent pairing
White on orange	3.15:1	3.15:1 · do not use for normal text
Hallelujah blue on blue mist	4.47:1	4.47:1 · do not use for normal text

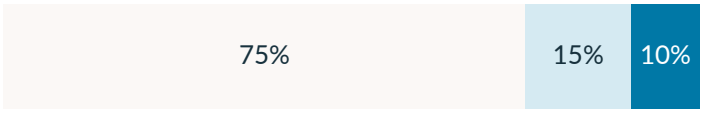

Normal text needs at least 4.5:1; large text needs 3:1. Meaningful non-text controls need 3:1 against adjacent colors. These checks cover flat colors; image overlays and complete co esting. W3C text contrast guidance ↗

How the whole site holds together

Let the light do most of the work.

Start with roughly 75% white and warm paper, 15% pale blue, and 10% stronger blues across a typical light page. These are composition guides, not quotas. Orange and magenta add small touches within the colored areas. Text, photography, and a deep footer naturally shift the balance.

Give each shade a reason.

- Primary blue: main action and selected identity moments.
- Strong blue: underlined text links on white, warm paper, blue mist, and blue veil.
- Deep blue: headings, pressed states, and the footer.
- Blue mist and veil: quiet grouping. Blue air is decorative; use deep blue for text on it.
- Orange is the main supporting accent; magenta is occasional expression. Green, amber, and red communicate actual states.
